

### A Systemic Boost.

It is safe to say that the average physician is called upon to prescribe a tonic more frequently than any other form of medication, unless it be a cathartic. Patients who are patients solely because they are tired, "run down" and generally debilitated, are constant visitors at the physician's office. Such individuals need something that will boost them up to their normal point of resistance and then hold them there; in other words, not a mere temporary stimulation, with secondary depression, but a permanent help to the revitalization of the blood and a general reconstruction. **Pepto-Mangan (Gude)** is not only prompt in action as an encourager of appetite and better spirits, but is also distinctly efficient as a blood builder and systemic re-constituent. It is pleasant, non-irritant, free from constipating effect and does not stain the teeth. It is thus a general constitutional tonic of positive service in all conditions of general devitalization.
