250 DAYS PAST

115 TO COME

Antidote for Therapeutic Pessimism.

Many a "doomed" case of pulmonary edema from heart disease, acute pneumonia or nephritis gives the lie to a fatal prognosis, if you know how to utilize powerful and repeated subcutaneous doses of the double salt of caffeine, or a few big doses (10 to 15 minims) of a good fluid-extract of digitalis, or strophanthin intravenously with or without good hypodermic doses of camphor in sweet almond oil, or big doses of musk or sufficient doses of a nitrite. Only those of us who do not know what medicines can do deny their efficacy.—Jacobi.
