Some Common Knee Affections—No. 3.

An injury to the knee may be confined to a small area, and yet the inflammatory extension may be such as to limit the functions of the joint, producing at times a general arthritis, less frequently a simple synovitis. The point of injury is generally marked by echymosis at the time the physician is called, and a little palpation will determine the exact focus of injury.—*Hunter; Mass. Med. Journ.*

Weather

Temp.

Rained & had
a terrible hail & storm,
boys was seeding, but
got drenched & had to
quit—Maudie took Melba
went for her, Aunt Bell
came for horse & they
went to Oles for dinner,
& to Cuttins for tea
Maudie took Melba & went
for her Mariah &
