

Wednesday April 28th

Dad. took the big team out first thing this morning and disked and as soon as I got the chores done I went out with the little team. Dad. took them and harrowed over the corn stubble and I disked on the barley ground till noon. This afternoon Dad. took the big team and ran out the band furrows in the corn stubble it took him all the after noon and he didn't get any cross ditches run. We didn't work the little team as they had a pretty hard morning of it and we didn't want to put finger on a tongue anyway so I did chores all the after noon. The cows broke out of the barn yard and I thought if I let them on the road they wouldn't go far as there is some lovely pasture but they weren't content to stay anywhere so after chasing around for about an hour I had to put them in. Win came over to tea to night and Frank has just gone down with her.

Bickles was down here to day with "Gruchety". It has been sunny all day with cool breeze a little thunder shower early this ^{morning} ~~morning~~
 Poor old milk man was married to Dad.

Thursday April 29th

Dad. finished running out the ditches this morning which I did chores and then I took the big team and disked the rest of the barley ground while Dad. shovelled out the ditches in the barley & oats, he says he dug up quite a few wire worms

I just finished disking by noon and took the disks up. This after noon I harrowed with the little team and Dad followed me with the drill. He didn't get started till after four so it was dark before he finished but he got through all but a plot 20 yds square in the north east corner which we left to sow my O.A.C. No 72 oats. Earl got an announcement of Carney Skeys wedding, he was married yesterday nice day but got wind all day.

Friday April 30th

Dad. went out first thing this morning and sowed the little plot of O.A.C. No 2 oats and harrowed them in as he sowed them broad cast he said they were a little thin in the centre of the plot as he ran short of seed. When he came in, he Sid dums and I went down town in the wagon and got Auntie Alice's trunks which were at the station having been checked right through and took them up to Hubys. My little chestnut tree from Glen Bess was there too. It cost me \$1.00 but by express. We got some cream pails over at the James' and some oats chopped at the mill. Dad took a whole wagon load of bags up to the mill for old & new and also got a bushel of clover seed at Billy Lains to sow on the barley and oats. It was raining a little when we got back
