

much higher. Frank and I made a cement post this morning and Dad did some more work at the culvert in the lane before the rain. This afternoon Dad and Frank fixed up the wire fence around the barn yard and put a barbed wire on the top of it and through the middle of it. I spent the afternoon hunting up data in my diaries where with to make a herd record. About five I went back to the gully after the cows but I only got the three we milk and the calves. Daisy May was up having had a red bull calf this morning. They took Jack Martin's young stock back to Ben Svey's gully this afternoon and as they were right down with our cattle along the lane fence Dad was afraid our cattle would break through our old barbed wire so I went back again to get the rest of them. I had an old rubber coat on but I got soaked as I was back in part of the heavy storm.

Thursday June 7th

Frank, Ernie, the Lady and I went down town in the wagon this morning we took our lumber for the Larness cup board and back down to Emery to change it for stuff that would not waste but Emery told Frank that for making doors with matched lumber it didn't matter about what price being put in with out any thing to nail to as long as they weren't
