

Wednesday May 12th

I harrowed and rolled the field to-day but didn't get any more than that done to it. Old Belle seems lazier and slower than ever and I couldn't seem to get away to-day. I hoed the raspberries at noon that I set out last fall, the ground was very hard around them. I quit work about five and helped Marj. enlarge the chick's run. To-day the case was to come up again but we don't look for news till to-morrow. Fine & warm.

Thursday May 13th

I disked the field ^{crosswise} this forenoon working till about one o'clock and this afternoon Marj. Harry B. & I went down town. We were out of bread & flour so had to go. I had intended trying to get my seed peas but we got such a late start I didn't try and Dad. is going down to the factory to-morrow after Frank's seed so will get mine at the same time. Harry B. went over to Mrs. Lumpkin's this morning with a note to ask her if she would keep Gay & the baby, so we left them there and they behaved very well. There was a cable from Mr. Parker to-day reading "Case adjourned 19th". The big strike over there is called off so they can get down to business.

Friday May 14th

I didn't do any thing else to-day but ~~disk~~ the field. I got a late start this morning and cut some of the lawn at noon so got out late this afternoon too. I found out that poor old Belle's sweat pad. had got pulled out too far around her collar and the edge of it was making a sore spot on her shoulder so I moved it and raised it to draught, and I think she has gone a little better to-day. Fine and warm looks a little like rain.

Saturday May 15th

I harrowed the field over this morning and had dinner a little before noon then took the team over home right after dinner to get the drill & seed peas. Dad. had just finished drilling in some oats over there before dinner and was coming out with the drill so I hooked to the way and brought the seed out and he brought the drill. I started to roll the field as soon as I had put the seed out and Dad. followed with the drill. He thought the ground was in good shape. He finished before six. Harry B. and Gay went over to Mrs. Lumpkin's this morning to return a dish and Harry B. found an old weather organ so was very pleased & proud of himself. Fine & warm.
