198 DAYS PAST

167 TO COME

**A Few Suggestions to Simplify Surgery.**

1. A good application of Tr. I. will sterilize field of operation while a patient is going to sleep.
2. A few towels boiled with the instruments can be used, after wringing them out, to cover parts about the incision.
3. One or two 5-yard packages of gauze (plain sterile) will be enough for sponges and pack off any cavity from infection.—*Junger. Med. Council.*

(Continued second page following.)

Weather

Very warm

Temp.

Mr Weaver came & took  
a load of straw for Mrs  
McLeay. Maudie's mother  
was out in the evening.  
Cengene was away. He  
road Maudie's wheel.
