93 DAYS PAST

273 TO COME

June 20, 1907.

Dr. W. Bailey Crawford, Indian Ter., says:

"I have prescribed your Pepto-Mangan (Gude) with most excellent results in two cases of suppressed menstruation, and shall continue to use it, as I consider it very valuable in anemic conditions."

It is well to bear in mind that arsenic and strychnine are compatible with Pepto-Mangan (Gude) at the discretion of the medical practitioner.

Froze hard last night, but  
thawed all out to day. Aleda  
took her mother to the Dr.  
this morning they were here  
a minute. John has been  
splitting wood all day, I  
planted two rows of onions  
in the little garden,  
I am feeling some better  
glad to say
