29 DAYS PAST

337 TO COME

To Render Infection Unlikely.

A normal proportion of functionally active red cells and hemoglobin, renders morbid invasion unlikely, in the presence of an epidemic of La Grippe or other infectious disease. Pepto-Mangan (Gude) aids the restoration of normal blood integrity and potency in anemic, marasmic and generally "run down" conditions.

Weather

Temp.

Very Cold with a strong east wind & very cloudy. Sleet & rain tonight about ten. John Denton's barn is now burning. Mr. Copes brought our mail. Albert came up with the milk, to the corner with shed's team, & John got him to get us a load of big wood. ad Polley's neck has such a large lump on it. Mella did the weeks ironing for me & helped me all day. Maudie is quite better again has been talking. Florence had been talking. Florence had an operation today.
