350 DAYS PAST

Sunday

16 TO COME

April 22, 1907.

Dr C. Von Scheele, Jacksonville, Ohio, says:

"I received your bottle of **Pepto-Mangan**. I gave it to a little girl six years old, who was recovering from a severe and prolonged case of Diphtheria. Nothing was retained in her stomach; and I put her on full doses of above preparation. From the first, her stomach commenced taking and retaining food, and she picked up wonderfully, without any other medication. I shall use it from now on."

Very cold wind in the
north east. Maude went
to church, & I went with her
as far as the Dr's & stayed
there. With Aggie got some
medicine. John & Huber
was home all day. Good
sleighing
