200 DAYS PAST

THURSDAY

166 TO COME

May 22, 1907.

Dr. Chas. C. Benson, Baltimore, Md., says:

"I have today received your bacteriological chart for which I thank you. I highly appreciate it as an appropriate and artistic decoration for a professional office, and also for its beautiful, scientific illustrations and exact reproduction of the specific bacteria characterizing the various diseases discovered in original research."

Maudie was to Mrs
Bing Stems

Warm Lead three skips
of bees & they all went back
in the old hives. We took
some sections of honey. Shed
was in & had some to eat
We sold some to Mrs Bingham
Morris Bline was out. Maudie
& Audra was done. Mr Cox
brought us a cat fish. Mrs
Davis gave John one, when
he was back cultivating the
corn field. Maudie & I have
cleaned the old house all out
getting ready for the bees
