41 DAYS PAST

325 TO COME

A Progressive Increase.

When regularly and steadily given in conditions of Anemia, Chlorosis, etc., Pepto-Mangan (Gude) brings about a progressive increase in the number of, and improvement in the character and quality of the red cells, as shown by the periodical blood count. The subjective symptoms (weakness, anorexia, dyspnea, etc.) are dissipated and the normal pink color returns to lips, cheek and conjunctiva.

Weather

Rather cold

Temp.

It snowed all day. Maudie took Mella & Maudie & I went for her. & sold Mrs M^{rs} Day two chickens for one sixty. John was over to see Scoves this afternoon. I made Mella an new underwaist - out of the yoke that she did. We drove the cutter for the first time today in a long time & the sleighing is sure to good
Billy to Polley to

Maudie is not well again
