201 TO COME

Surgical Hints.

In suspected fractures of a leg or arm, if an X-ray apparatus is not accessible and the edema is so great that we are unable to satisfactorily palpate, the swelling may be reduced by applying a Martin rubber bandage from the toes or fingers up the limb.

In cases of green-stick fracture from indirect violence with little or no deformity, bone tenderness may be the only symptom present, and it is important to always look for it.
—*Int. Journ. of Surg.*

Weather

Temp.

Very warm
Girls' came home to dinner
Eugene brought Al to
as far as Mother Dances & then
came on over for dinner
Maude & Kella went to
