

Eggs &  
**Wednesday, February 23**

54 DAYS PAST

312 TO COME

**Four Common Types of Heart Disease—No. 1.**

**I. The rheumatic group.**

Here are included the cases associated with (a) rheumatic fever, (b) chorea, (c) acute tonsillitis, and (d) "primary endocarditis" with negative Wassermann reaction. The trend of recent investigation indicates that a streptococcus is responsible for all these types, affecting most often the pericardium, myocardium and mitral valve. The characteristic valve lesion is mitral stenosis.—Cabot; J. A. M. A.

**Weather**

A lovely day

**Temp.**

thawed. Melba road to school  
with Clarence & walked  
nearly all the way home, Po  
went part way for her. Mrs  
Spinner called. Mrs Du Aug,  
Austin, Aunt Bell & Uncle  
Lewis. Mrs Skinner brought  
her another Hyacinth. John  
has been drawing manure with  
the Colt. Clarence boy was  
married
