

for a wonder were not hurt, for
we went right up against a fence.
We then pulled the back out and
put it on the wagon and found it
was very slightly damaged. We
then proceeded to ^{put it in} ^{the mow} ^{in the mow}.
John and I got up in the loft to mow
away. I had not been up there very
long when I began to feel faint and
could not breathe very well. I
kept on a little longer (it was back on
the mow) and then I could not stand it
any more so I went to the window
but felt no better. Then they told
me to come down and I had a
wash and Mrs. Luanhany who
was just about scared to death put the
sight of the upset brought us out
some raspberry wine for and cooking
I went and lay out under the tree while
the finished Stuby took my place but

did not stay there long. I felt quite
a lot better when we started for
home. We got what was left in the
field (22 cobs) and took it into the barn
and left it there waiting for ~~the~~ Sam
Robinson to bring the fork and shing.
He came to night with the shing
ropes but the rest has not come yet.
When we got through with the hay
Bill and Daddy went back over the
gulch to mow the clover, and I
drove Stuby and Lita down home
with Joe. I took Stuby up to get
a setting of Rhode Island Red eggs
"off" Mrs. Mat. Wilson. I got
home about six and raced Dick
on his wheel from Martin's. He kept
a little ahead and made old Joe beat.
It has been terribly hot today
There is a heat wave passing over us
they say. The forest fires are raging up among
Porcupine.
