

August

FRIDAY 28

1896

Had Mr. Melean
to help us draw
in covered
about three hours.
This forenoon.

Jim and I kept
the remainder
of the day.

Have succeeded
in getting five
wads, mostly from
the wind-snow,
drawn to the barn.
With the load
brought in last
night makes
six in all so far.

We are still
blessed with
beautiful cool
dry weather,
just right for
taking care of
crops.

SATURDAY 29

1896

Have been busy again to day at getting in clover seed, done 8 m. field by Mr. Brice C. Helton helped me about three hours this forenoon so we were enabled to get in three loads more this forenoon and Jim and I got in one this afternoon, making her so far from the field.

Went out to houses this evening, to look after some small matters.
