81 DAYS PAST

284 TO COME

Hundreds of Series

of hematologic examinations have abundantly demonstrated the blood constructing value of **Pepto-Mangan (Gude)** in the Chlorotic Anemia of young girls. This classical "green sickness" of the older writers is peculiarly amenable to its prompt hemoglobin creating power and general tonic and reconstructive effect.

Weather

Temp.

It stormed all Sunday
four noon, but Joe & I washed
& in the afternoon it cleared
up, & nearly all the clothes got
dry. Maudie & I ironed all the
evening. Maudie took Mella to
school then went for her.
Eugene was over for dinner.
He & his Father went to Aylmer
before dinner. I took the things
all out the Parlour this afternoon
& swept & dusted it.
