

It has not been so hot today. After a cool breeze this morning and the rain moderates the heat as it is quite cool to night. There have been 33 deaths in Toronto and I heard from the fact.

He said he would but never turned up. After dinner I went down to borrow my ice-cream freezer while Bill Daddy and Hubby went over to get a load. When they came back we started to make some ice-cream. Then they came back with the load and I helped mow it away. It ~~had~~ rained a little and looked like more so they decided to wait and see before they went back for another load. Finally they did and just got back at six. Hubby did not go that soamed around the farm and I helped Enak put some of the books away. Then Hubby and I went out and tried to mow a little lawn. The ice-cream was fine and we had some of it for tea.

After tea Dick Hubby and I drove Joe down town and went in for a swim. Bill and Lila were in, too and Bill thought the water was fine.

Friday July 7<sup>th</sup>

This was Daddy's birthday and he celebrated by hauling in hay. He, Bill and I went out and Bill raked up and we hauled in a load and put half a load which was weedy in on top of "Titus's". Old "Physicks" was here working at the pumps when we came in and I stayed to help him and Dick. Hubby never turned up to-day. Felix stayed to dinner. After dinner Bill went out and started to mow the timothy. Daddy and I gave greened the spuds and then Daddy went to rehar Bill while he come up and sharpened the mower knife. I peddled the grind stone for him. Daddy stayed out till about eight o'clock. Sam Robinson brought the rest of the hay unloading rig to night. We churned to-day but it was not very good although it was cool and breezy to-day.
