

morning and each came down to church. Mary and I went down to Auntie's for lunch and about three o'clock went up to the Monteiths which I pumped some water for them up there and then we came over here to the farm and had tea. Dick Gonshe was over for a while to see Dad about a sick cow. Nice sunny day, cool wind.

Monday April 14<sup>th</sup>

Art Quahury came over about eight o'clock this morning and we have been shingling all day and got the east side of the parlor roof on. We went looking for Art till this afternoon and were just ready to haul over a little hay but Frank hauled the racks over to the barn and then went down town and got the gutters from Hugh M. Queen and Dad and I hauled over a little pig of hay when he got back. Sam Law came up after dinner with his hammer and axon and said he heard us hammering so just came up to give us a hand. I suppose Tom has told him we were shingling. I went to hand practice.

Tuesday April 15<sup>th</sup>

Art came over this morning and we shingled till

noon and got about half of Dick's bed-room roof on but just at noon it began to rain and has kept it up all the afternoon and evening. Snow drop presented us with a black and white heifer calf this morning so it took considerable time after dinner to tend to her and do the other chores. We put some costie put ash on the two young eat calves Lora and Frank and I put up a lot of hay from two far heat in the big barn up over the sheep pen so that it will be handy to load when we can get the way gone over. It was cold this morning but about noon the wind veered a little more to the south east and it got a little milder. Dad had to go up on the roof <sup>to night</sup> to stick some shingles over the bare spots where it was leaking.

Wednesday April 16<sup>th</sup>

It rained hard and steadily all morning and I think all night. It cleared off two or three times during the afternoon but rained most of the time and is cloudy to night. We haven't done any thing but chores all day and sit around and read. The ditch running through the sheep pasture is a regular river and when Frank let them out at noon most of them plunged right through it as they have
