

Have had the boys at work manuring and planting Southern sweet corn for cow-feed, at which I helped them this afternoon. Worked in the garden this forenoon.

The weather has been quite cool but other-ways very fine so far. Frost seems to have gone for this Spring. Never saw fruit move forward than at present, so early in season.

Uncle John this evening that my friend Mrs. Warren is much more ill than before. She is scarcely expected to live from one day to another. She is prepared for the change I know not doubt.

Had an excellent discourse from our Bro. Ellis this morning, the minister being away at conference in St. Catherine's. Did not have a very good time in the class meeting afterwards. It fell to me to read as usual. Our dear sister Warren passed peacefully away this morning, after an illness of over eighteen years. Did not hear particulars of her last moments, or earth.

Visited, and prayed with Bro. S. M. Phares this evening. He has been suffering for some time with disease & wait for his release. His feet are upon the Rock, that *God!* He is safe.
