

Monday May 3<sup>rd</sup>

Frank and I went up to Miss M. Coy's this morning and got another load of hay. It was after noon by the time we got it home and off. Dad. harrowed cross ways ~~on~~ what we sowed this morning and Frank finished harrowing it this afternoon and started in disking the corner field. Dad. and I hauled out the manure I had weighed up for my plot and some more which we mulched some of the little poplars along the side road with. We then brought the plow out of the corner field and ran the ditches in the sowed piece and Dad. started to plow the head land in the corner field. Winnie came over to tea to go with me to the party to night. Frank had arranged to take Kibbler, Kipular and Junnie Ward so he had to take them out first then come back and get Win & me. We had a very good time out there. Bobbie M. Milland was the orchestra and Fred Kell the master of ceremonies. there was a good crowd out there and lots to eat. Frank drove Win & me home about one o'clock and then went back after the other girl.

Tuesday May 4<sup>th</sup>

Frank and I had to go back to the back field first thing this morning to get the cattle out of the woods as they had knocked down and broken a bar. I then drove Win. down to the bank and when I got home Frank and I put on a load of manure and took it down to Auntie Alice. We

brought home some posts from Jack Reynolds to put along the road for a fence. Dad. plowed the head land in the corner field this morning and he and Frank worked on it this afternoon. We are going to work up just half of it posts and put some on the rest of it. I did chores and sowed my last experimental plot with oats. I went down town to night.

Wednesday May 5<sup>th</sup>

Dad. & Frank worked on the corner field all day and hope to have it ready to drill by tomorrow afternoon. I went out and burned some old rubbish in the corner field that had been along the old fence bottom, then I cleaned out some ditches in the sowed field. Frank and I treated some more oats this afternoon and a little barley which Frank went down to the mill for. Remembering our last experience we were determined not to do the job in the granary again so we cleaned off the burn of floor but that took a long time so that by the time we got done there was no time to do any thing else much. Frank went out and sowed two kinds of Spring wheat on the plots. I went down to hand practices to night. Beauty Alice was over here to tea. Fine & warm all day but it freezes every night.

Thursday May 6<sup>th</sup>

Dad. & Frank worked all morning on the corner field and drilled it in this afternoon with the big drill.
