262 DAYS PAST

WEDNESDAY

104 TO COME

Tinea Tonsurans.

The diseased surface is mopped with tincture of iodine. This is followed in a few minutes by the application of a 2 per cent. aqueous solution of corrosive sublimate. The beneficial effect produced is due to the formation of mercuric iodide at the points of contact. Goose grease is the best skin penetrant. Irritation is avoided by treating only a small portion of the diseased surface at a time.—Sutton; Am. J. Med. Sc.

Weather

Temp.

Rained & night
but fine all day. Had
an accident with a
car, three men was hurt
Patterson, Hilleker, Carter
was hurt, Mandie
& Grace went to school
I have been carrying buckets
all day. George Davis got two
bushells for me. John has been
helping Lewis thrash all day
Clarence was over to day, I
milked all the cows
