

automobile trip down into New York State some time next month and wants to have a meeting in Sincere tomorrow night to arrange the details. Frank said he would try to go up. I went down town to night and Marj. and I went over to Miss M. Queen's and I got some last year plants that they had got for me from Miss Maston's hot bed.

Wednesday May 26th

Frank and I hauled manure all day and finished covering the corn ground. I cut the lawn in between roads and got it all looking slick. Dad. did odd jobs and hosed over in the garden. Frank went to Jeff's meeting to night. He said they had about fifteen out representatives of the different J. F. I. A's throughout the County and formed a sort of County association with a Victoria boy as president and Bill Nixon as secretary. I went down to band practice to night. Very hot to day.

Thursday May 27th

Dad. worked on the corn ground all day. Frank went down town this morning and got some seed corn and this afternoon he harrowed on the corn ground. I just did odd jobs and took my harness to pieces and sussed it up a little. Stuck the back stick out of the saddle and couldn't get it back in a gain. I went down town to night but none of the boys showed up. I did a show card lesson after I got home. Very hot warmish.

Friday May 28th

Dad. worked on the corn ground all day. Frank worked most of the day but went up to Sam Thompson's to see if he could come down and plant corn for us to-morrow but he said he couldn't come till next week so we will if all's well mark it and plant it by hand to-morrow. Ed and I drove Mexico down town this morning and I dug a patch for Aunty Alice to plant potatoes and some holes for squash and then went up to Mr. Johnson and he gave me a lot of perennials. We stayed at Aunty Alice's for dinner and came home right after and spent the rest of the afternoon setting out the things I got from Mr. Johnson. I went down town to night and went to an athletic meeting in the town hall but as Ernie West Jackson, Frank Smith and Marrison were the only ones there we didn't do any thing. I left at nine and went down to Aunty's for the rest of the evening. Marj. was there having had tea there. Turned cold during the night. Cold ^{day} would.

Saturday May 29th

Dad. marked the corn ground this morning and I went with him to pick up the ends of the masher on the turn. Frank rolled the field down ahead of us and then went around to Pickford's & Mr. F. Lemmings and borrowed their corn planters. Billy Mills came over after dinner and he Frank and I planted this afternoon. We ran out of
