240 DAYS PAST

TUESDAY

126 TO COME

Abstract of case by Dr. Geo. L. McCoy—Continued.

The X-ray treatment was instituted and continued for at least a month before the least change was to be seen, save that the mass did not increase further in size. Finally improvement began, but while at one point it seemed to improve, at another new masses were found. All the while the patient grew paler and still more pale, even though she seemed to improve otherwise.

Continued on next page.

Remind I came home
from Augere's to night
Gils was sewing for
me and made a lot of
towels
