

Sunday October 31st

Mary, George & Harry B walked to church this morning while Frank and I did house chores and looked after Gay & the Doodle-bug. Frank got in line with several church services over his Radio. Harry B stayed down at Auntie's for dinner and Mary & the boys and I drove down and got him this afternoon. We got St Paul's (Toronto) service quite plainly by Radio to night all except Canon Cody's sermon.

Monday November 1st

Frank and George went down to Pickford's to help him load some pigs this morning and then Frank made a corn horse and this afternoon we all started to cut the corn by hand but it blew and drizzled rain so that we got sick of the job and all went down to the creek for a while. Our curiosity was first aroused in that direction by a white object down the road which on closer inspection proved to be John S. Martin's new manure spreader. It had been the object of a Hellawell's prank and treated to a coat of white wash. Cecil & Co. finished at home to-day. Mary & I went to the picture show to-night.

Tuesday November 2nd

Mary, the kids and I all drove out home this forenoon and Mary hunted out some extra clothing while I killed and picked a chicken for Auntie Alice. Frank and George picked up 20 bus. of apples this morning and this afternoon took them over to Charlie's and had them converted into cider. I picked a couple of hamperes of sweet apples this afternoon. The boys were so interested by our account of Harold Lloyd in the show last night that they went to see him to night.

Wednesday November 3rd

I went over home this morning and took my lunch. Frank, Storch & Brons's Brods went out and patched the cistern. I picked some more apple, killed 3 more chickens and pulled some mangolds. Frank & George were at Martin's all day threshing. Mild but cloudy.

Thursday November 4th

Mary had Mrs. Waldick over to help her do some cleaning to-day so George & I decided that it was no place for us and went watching over to Jack's, and persuaded Frank to stay home and help the ladies. Fine day.
