

Tuesday March 13th

Didn't do much this forenoon but chores. I had a look at the bees and gave them some frames of honey in the super. I had an early lunch and then started out to get Frank to take him to Harry's sale. I was supposed to wait here for him but was afraid the road back this way would be too bad so we went all the way around by the highway and down through Lynn Valley and that road was fierce on account of fresh gravel. Art Juanchury went up with us. It was a big sale and things went up pretty well. I saw Albert Gurney pay Alex Englund quite a huddle and Alex said he hadn't expected to get it so I advised him to celebrate the occasion, and he acted on the advice. I drove him to Simcoe and we together with Frank Jones & Colin had a very enjoyable time for the remainder of the after noon in spite of the fact that it poured rain all after noon. I didn't buy any thing. I don't think I did at least and Frank drove the car home & kept it all night.

Wednesday March 14th

It turned a little colder during the night and I decided

I had better put the bag of chaff back on top of my bees so went down and took out a lot of the empty frames and put in some of the full ones out of the other hive. I got one stinging the first of the season. I then went over to Art's and got three roosters and took them over to Louis. This afternoon Frank brought the car out and reported that the roads were next to impassable so we called up and told Aunt Alice that we would not be down to-morrow to celebrate the Wumpus' birthday. Frank walked back to feed his calves and then walked back out here and had supper and stayed with the kids this evening while we went down to the Evans. We drove the car that far as the flats are still good. We had a lively time down there playing crakin'ole & singing revival hymns. The Shavers, Charlie Buller's, Roy Hammond's & Lampkins were there. We got home about 3 o'clock A.M. Cold wind all day. Freezing ^{to night}.

Thursday March 15th

Mary has felt tough all day and is getting a bad cold. I didn't do any thing but chores all forenoon. Tom had to go to town after some feed and this after noon we got an hour or so more in at the ash tree and got it in good shape to finish up. We didn't have much
