13 DAYS PAST

353 TO COME

Dr. A. O. Fasser—Concluded.

increase of 35% on an average under **Pepto-Mangan**, one ounce, three times a day, with plentiful diet, without any digestive disturbance whatsoever.

The second case was one of marked anemia in a school girl, and here the results were not so striking, but still very satisfactory."

Snowed such a lot last night and is drifting to day. Girls had a lovely time with Clara last night. Didn't come home until dinner time. The girls ironed & I tried out some of my board. quilted another little quilt.
