227 DAYS PAST

WEDNESDAY

139 TO COME

Dr. Chas. J. Mooney, Washington, D. C., Dec. 12, 1906.

“It gives me great pleasure to say that the bottle of Pepto-Mangan (Gude) which you so kindly sent me, was prescribed in a case of Chlorosis. Other bottles of your preparation have been used in same case and have given good results. I made a blood examination and find an increase in hemoglobin, also an increase in the red cells, which were diminished. General condition of patient much improved.”

Very warm Melba event & Mylene this morning, & I night Melba & I went to Kingsmill & got some boxes for young helped for all day I washed, the girls made a box for two hives. Eva was here & got some honey!
