265 DAYS PAST

~~SATURDAY~~

101 TO COME

**An Urgent Indication.**

Saline Infusion is often necessary when the blood volume is appreciably reduced, as a result of sudden hemorrhage. Subsequently, a corpuscle-building and hemoglobin-creating agent is urgently indicated. **Pepto-Mangan (Gude)** is the most easily tolerable, non-irritant and readily appropriate combination of organic iron and manganese, and is readily taken by patients of all ages.

a little we had the  
trashers all day, didn't  
finish, Aunt Bell came  
for Lewis & they was with  
us for tea. Mollie & I went  
to Ayler's to night,  
I brought a chair  
home that the wind  
gave me, no. Mollie got  
a new hat & Cap for herself  
& a cap for Maudie Mariah's
