### Functional Kidney Test.

The removal of a diseased kidney and the retention of one whose power is inadequate to carry on the normal renal function of the two kidneys is, of course, followed by death. Such a result is almost impossible if a preliminary cystoscopic examination combined with ureteral catheterization is performed.—Nelson; Lancet-Clinic.

Weather

Temp.

A fine day  
We all went to Church  
& then to Mrs M<sup>e</sup> Yeary's  
for dinner. Mrs Thompson  
& Bayder were there. The  
girls stayed to tea &  
went to Church. John  
and I came home  
then went back to  
Church & got the girls.  
had a lovely time all  
day. Polley 10
