93 TO COME

A New Iodine or Indican Test.

To 10 c.cm. urine add an equal amount of concentrated hydrochloric acid and 2 c.cm. of a 10 per cent. solution of cupric sulphate. Both iodine, if present, and indican are set free. Shake the mixture with 2 c.cm. chloroform. If iodine be present, the chloroform will take on a typical violet color, which disappears on adding a sodium hydrate solution. In the presence of a considerable amount of indican, the chloroform takes on an indigo-blue color.—Jolles; Berl. Klin. Woch.

Weather *a fine day* Temp. *cold this*

Morning *but quite warm during*
the day. *a hard frost last*
night. Girls drove to school
& I went this afternoon & took
Billy & got him shoes. Got
Melbas new plaid coat. Blacken
ed my shoes & put them up
But Joe was cutting corn all day
Mr Cox finished drawing his
canning house corn had four
loads. Boyden his mother went to
Grandfather yesterday & when we went
