190 DAYS PAST

175 TO COME

Gynecological Hints.

It is a bad practice to give purgatives a day or two before performing a laparotomy. If you do, the patient is apt to suffer severely from gas pains for several days following the operation, and an evacuation from the bowels is difficult to obtain. If the operation is to be performed in the morning, a simple enema should be given the night before, and if during the afternoon, this should be done the same morning.

—Waldo; Amer. Journ. of Surg.

Weather

Temp.

Very warm almost

A warm to work. John Cargas
& the man was at the cow's
place all day. I milked nine
cows & Maude's one. Wilfred
was up this afternoon brought
Maude's two large flies. Jennie
Rogers & little girl was here to
night. John has gone to Auburn
with Mr C Thompson to a meeting
of the woodmen. The horses
Polly & " worked all day
