Saturday, October 12/8

291 DAYS PAST

THURSDAY 75 TO COME

March 25, 1907.

Dr. L. H. Crapp, St. Louis, Mo., says:

"I used the original bottle of **Pepto-Mangan (Gude)** you sent me on a patient for a general run down anemic condition, following an operation. It has done its work well, and the patient is feeling very much improved. Examination of the blood before and since taking shows a marked improvement."

Rained several times,  
I took the girls & went for  
them. Got some geraniums  
at the high school to put  
away for winter. Eugene  
& Mr. Mickle was here & got  
four new lambs & Bubbly  
for Mr. Mickle. I was to Mr  
Maude Thompsons & Mrs  
Spinners a little while this  
morning. John has been  
bloughing all day. Maude's  
went to the Dr to see about her  
lamb leg.
