137 DAYS PAST

228 TO COME

Saline Infusion

is often necessary when the blood volume is appreciably reduced, as a result of sudden hemorrhage. Subsequently, a corpuscle-building and hemoglobin-creating agent is urgently indicated. **Pepto-Mangan (Gude)** is the most easily tolerable, non-irritant and readily appropriate combination of organic iron and manganese, and is readily taken by patients of all ages.

Weather *very cold*

Temp.

I drove the girls & school
& got my hat fixed over
I went for Keller & Grandma
stayed to Mrs. Selmes for
to go to the young people's
in the church. We washed
& I have my ironing all
done but the table clothes
John Wickner had another
call die this morning & the
Mariah to Billie & Bactay & King

for keep was over 50 night
