went part of the way home with the kiddies & then went to the station and Margaret & Isabel left on train for Dialstone. Evening spent discussing Physical Culture classes which Dudley & Margaret propose to start. About 10 o'clock it started to rain & just poured. At 11 p.m. the phone rang & Charlie asked me to go over to McConnel's to get Leon to go down as he had misfixed the pipes on the mill properly & rain was pouring into the Millinery room. Went over in my heavy kimona (as was ready for bed) The rain was just pouring down and was deep at the curb. Straightened the end of a table cloth getting it ready there.
