213 DAYS PAST

153 TO COME

Post-Septic Anemia.

Timely hematogenesis is required to repair the damage to the blood caused by septic infection and its devitalizing influence. Post-septic or post-suppurative anemia is usually quite apparent if the infection has been at all prolonged. **Pepto-Mangan (Gude)** is both prompt and efficient in blood building therapy and is always well taken, rapidly absorbed and readily tolerated.
