323 DAYS PAST

42 TO COME

An Annoying Class of Patients

which every practitioner has, is anemic school children, whose appetites are poor and who are often nervous and irritable. **Pepto-Mangan (Gude)** is a very satisfactory medicament in such cases. The large amount of work which is crowded upon school children at the present time is a severe tax to their powers of endurance, and we believe the suggestions given will be found of practical value.—*Wisconsin Medical Recorder.*

Weather

Cold & Spitting

Temp.

Snow a good part  
of the day. I drove the  
girls to school, was at  
Mrs McLeays, then  
went for them. Went  
to the Dr this afternoon.  
Lenore Demmary was called  
on to take the chair by  
Billy & Maud Sweet.
