

Friday November 14th

It froze hard last night but Frank was able to plow and has been at it all day. I went back to the gully this morning and chopped a hole in the creek for the cattle to drink. Then I spent the rest of the morning moving the hay around in the horse stable so that we could put some straw up there. We wanted to move the stack or what is left of it in to day but it was too windy. I didn't do anything much all the after noon but a few chores. We put the cows all in this after noon as well as Wilkins Micauber Renozierna and Nancy. Wyatt Waddle and a few Wood spent were here this after noon to sell Dad a mower. He said if they would allow him \$40.00 on the old one he would get a new \$90 as one from them so they were going to try to deal it off. Euch went down town this after noon and sold four dozen eggs for me @ 65 cts. I got 16 eggs to-day. I went down town to night and Frank went to a dance at Hank's.

Saturday November 15th

We spent most of the morning getting ready to haul straw we had to take the box off the waggon and put the rack on. We had quite a time with Wilkins

Micauber who being horse sick and loves one for his ma was very persistent in his attempts to jump out of the pen. He did jump out once and we had to put another plank on. Another delay was caused by Cousin Abhatt coming after his pigs. Dad sold him the whole litter, nine, for forty dollars, one was a very runt one. We got two sling loads on and over to the horse stable before dinner but didn't put them off. We put them off after dinner and then which Frank went down town to send off an order to Eatons for a stove which we are getting for the dining room. Dad and I put on two more lifts and put them off in the horse stable. We had very poor luck putting it off as it was too short to lift. We then put on a fair sized load and hauled it in on the barn floor. Still cold but sunny, mildest yet.

Sunday November 16th

Frank, Lid. and I went to Sunday school and Euch came down to church. I stayed at Auntie's for dinner and was there most of the after noon. Lida and I came over here about four o'clock, stayed to tea and went down again. I spent the evening with Mary who had been in Vittoria with the Johnson's. Much milder.
