267 DAYS PAST

99 TO COME

Prolonged Lactation.

A steady drain upon vitality almost always leaves its traces upon the organism generally, and especially upon the blood, in the form of Anemia. This is especially true of prolonged lactation. **Pepto-Mangan (Gude)** does not check the drain, but, by stimulating blood formation, helps to make good the vital loss, and is thus of distinct service to both mother and child.

Weather

Temp.

A fine day
Girls stayed at Mrs McLeay
all night; came home before
dinner. Girls & I went down
to Arthur Cavellies for melons,
then to Arthur was at Mrs
McLeays, then home. Daddy
is cow hunting; he did
an ironing Clifford Skinner
was up to see the puppies. Mrs
Leoc stopped daddy watering the
cows was there. Mariah 9
