

We then went over to the L. E. & N. Station as Frank and Wini had to come down on the car. They missed the one o'clock car but for some reason or other another went down at half past one so they took it. I brought the little saddle up in the buggy so rode Joe home. I didn't come very fast but got home before Frank, who had been down town some place. When he got home, he Dad & the baby went out with the wagon and cleaned up the rubbish around the old garden and the fence bottom between the corner field and the one north of it while I cut some of the thistles in the pasture field. This morning Dad, Cuck and the baby went back to the woods and picked berries and Dad. I stacked up some of the town oats. Nice day, cooler.

Tue. day August 15th

We hauled twelve three loads of oats to-day and up set the first load on the side hill. It was a very neat set wagon and all went and put the half load of oats we had on in a nice heap but didn't ~~hook~~ a thing.

Wednesday August 16th

We finished hauling our oats to-day. We

hadn't much of a harvest. The oats and barley were good ^{but} than ~~the~~ ~~oats~~ we had I think these were only five loads altogether and they together with the wheat just come up to the second beam in the old barn. I am not writing this account very fully as it is over a week ago now since I wrote last. Frank took the mowee back and finished cutting the weeds over trees on the fall plowing.

Thursday August 17th

Dad had to go over this morning and help Pick for thrack and was over there all day but they didn't do much all morning something was broken. Frank and the baby went down town in the wagon and got a bush of saw dust for Green's box stall some provisions a cedar post & put the mail box on and the mail box. We spent all the after noon dressing the post and putting up the mail box but made a good job of it. The only trouble was they had the name stencilled the name on the box with just one r. which made Dad furious. I got a cut of stuff from Charlie Loev to-day the crate fallen some chickens I have to make a crate
