305 DAYS PAST

61 TO COME

Not a Negligible Quantity.

The anemia of adolescence should never be ignored. The correction of improper hygienic conditions, and injudicious habits of feeding, should be supplemented by the use of a non-irritant, readily absorbable, non-constipating hematic, such as **Pepto-Mangan (Gude)**.

Weather

Temp.

~~Rained~~ several times
but cleared off to night!-
I took the girls & went for
them; they had an at-
home, at the school, but
the girls didn't go. The
little boys along the road
came up holloweering
to night!- John ploughed
all day between the showers
