

Daddy and Cuck saw old Bell down town he is going to logging
to start. We set to work stay with Jack Pine in town to morning
and start Saturday. He said it was breaking up. Some of his
wife was so opposed to the trip. He was the rest of the morning
at night he was in earnest. He talked up gulls and when they
found out he was the finished up gulls and when they

Thursday August 10th

Worked around the stable all day
with Emery. We got all the sides boards
up. Daddy worked around there too most
of the time but Wyatt Parsons came to
measure the grain fields. He measured it
with a tape line so it took a long
time and Daddy had to help him. Cousin
Clay came over this morning and stayed
all day. About four o'clock Daddy and
Dick went over and stocked up the rest
of the rats. We all went down to
night to hear the band. Dick rode his
wheel and I walked. Daddy and Cuck
drove Cousin Clay down with Joe.
I went over to the park to watch the
dance for a while got some post cards
talked with Roy Della white and then
went down to Mrs. Davis Moore's corner
and met Daddy and Cuck and drove
home about half past nine. H.H. 4.1.1911

It rained early this morning and has been cool and cloudy
the rest of the day.

Friday August 11th

We all worked at the stable this
morning. We sawed the timber sill
off in the drive way which took about
half an hour with Blake's cross cut
and got quite a glut of cement laid in
the alley way.

I drilled all the afternoon on the
wheat ground and finished it. They got
the rest of the cement laid in the alley
way.

After the chores were done to night
Daddy saddled Joe and I had a nice ride
around Flemming's block. Then Dick
got on but could not reach the stirrups
so he asked Daddy to get on and he rode
down the lane and ploughed for
our benefit. Dick knocked the old
wooden trough at the wind mill to
pieces and we are going to put up the
concrete as soon as possible.
