An Appetizer, Tonic and Reconstructive

is needed after scarlatina, diphtheria, measles, etc. Other-
 wise convalescence is apt to be unduly slow in the case of
 children whose nutrition is "below par." Pepto-Mangan
 (Gude) relieves anemic conditions, stimulates the appe-
 tite, tones the organism generally and acts as a mild but
 thoroughly efficient general reconstituent.

Weather *very cold but* Temp.
