### **{MEMORANDA}**

Eccles. III I, "To everything there is a season or opportunity of doing." Time may be continued when the season of time is lost; the sails of time may be aloft when the opportunity of time is lost. Every time is not a springtime, a seed time, a gathering time.

"Who goeth in the way which Christ hath gone, Is much more sure to meet him than ~~the~~ one that travels both by-ways."

Basis virtutum constantia. Constancy is the foundation of virtues. Be right and persist.

### **{MEMORANDA}**

How to get rid of the Pea Weevil or "pea bug"

Place the quantity of peas to be treated in an ordinary 45 gallon coal oil barrel which will hold about five bushels of peas. The quantity of carbon bisulphide that has been found necessary to destroy the weevil is one ounce to every hundred pounds of seed - the treatment lasting for 48 hours. Place in a saucer on top of peas or else pour over them and cover quickly. The carbon is extremely inflammable both in liquid and vapor form so care must be taken not to have any flame, not even a lighted pipe or cigar which is slavish anyway, near the barrel. Barrel must be kept tightly closed for forty eight hours. This does not injure the peas for seed or feed.
