286 DAYS PAST

*Sunday*

80 TO COME

**Erysipelas.**

Judd has obtained excellent results by swabbing the affected area and for a half-inch margin beyond with 95 per cent. solution of carbolic acid until moderate blanching of the tissues occurs, then swabbing with pure alcohol until the whitened area becomes pink again. Only small portions should be treated at a time, and usually one application is required.—*Exch.*

**Weather**

**Temp.**

*A fine day  
heavy frost last night.  
frost ice. Mrs. Topley  
& Melba went to church  
Daulds Pitten, died  
last night at Dr  
Davises.*

*Billy's*
