334 DAYS PAST

31 TO COME

The Comatose State.

The first step should be to avert immediate danger from the heart or respiration. Then seek to discover the cause of the coma. If due to a poison, an antidote, venesection, stomach pump, vomiting, stimulating kidneys and purging as indicated. These failing, then the treatment can only be expectant and symptomatic. Close supervision must be kept upon circulation and respiration. Where there is paralysis from a poison atropine sometimes restores the muscular tone.—*Grober; Dent. Med. Woch.*

Weather

Temp.

*A cold snow
flurries off and on all day.
John & Joe was husking
corn in the barn, after
they put a post in the fence
that the gate hangs on,
by the cellar top & round all
frozen over. Mr. Bing ham
has gone down to Jennies,*
