125 DAYS PAST

241 TO COME

Indications of Vitality.

Forcefulness and energy are the attributes of good health and serve as indications of the vitality and sufficiency of the blood. Lack of force and reduced energy, in a large majority of instances, indicate a more or less devitalized blood stream. **Pepto-Mangan (Gude)** raises the blood standard by supplying the essential material (iron and manganese) for increasing the solid, vital elements of the blood—the red cells and hemoglobin.

Weather

Temp.

Warm Maudie took
Mella & went for her. John
& Charley have been fixing
fence around the barn
yard & along the road.
I relined & her mother was
over a few minutes. Maudie
finished the dining
room. Boy took care of the
meat
