85 DAYS PAST

281 TO COME

A Constructive Trinity.

The anemia of innutrition so frequently observed in patients of all ages, is symptomatic of a general devitalization. Fresh air, nourishing food and Pepto-Mangan (Gude) constitute a reconstructive trinity of marked and certain value, the last named agent increasing the oxygen-bearing capacity of the blood stream, and thus aiding directly in the absorption and appropriation of the increased food supply.

Weather

Temp.

A lovely warm day thawed all day, with a cold east wind to night. I went to Aymer & Mella went as far as Mrs Skinner's & stayed with Alice. I got medicine for her & Mr Mills told me to get some camphorated chalk for her cough & it has helped it all ready. Eugene was over and brought a little black calf over then he & his father went to Aymer

Saw the Grey birds & blue birds

hard cutting  
Brendo was used all day
