83 DAYS PAST

282 TO COME

The Substantial Elements

of the vital fluid must be restored and reconstructed if the treatment of post-malarial anemia is to be ultimately successful. In other words, the "restitutio ad integrum" of the blood is the definite aim and object in this condition. If Pepto-Mangan (Gude) is regularly administered, after the paludal poison has been neutralized, it can be definitely depended upon to restore and re-create red cells and hemoglobin.

Weather

Temp.

Warm but stormy

Looking all the afternoon, Audie took Mella & brought Mrs McLeay home for dinner & then after dinner took them down to Mrs Millars. Eugene was over for a load of hay & to dinner. Old Star had a little calf this morning. Mella is not very well to night.
