41 DAYS PAST

325 TO COME

A Progressive Increase.

When regularly and steadily given in conditions of Anemia, Chlorosis, etc., **Pepto-Mangan (Gude)** brings about a progressive increase in the number of, and improvement in the character and quality of the red cells, as shown by the periodical blood count. The subjective symptoms (weakness, anorexia, dyspnea, etc.) are dissipated and the normal pink color returns to lips, cheek and conjunctiva.

Weather

Temp.

A dandy day
 much warmer. He was home
 all day. Maudie was very sick
 last night, & I went down to
 the Dr. & got medicine for her
 about two o'clock at night.
 Albert & Polley was up last night.
 Maudie is better to night.
 Mrs. Herbert had quinsy &
 her throat gathered & black
 Friday. Myrtle & family clearance
 a family was over to her house for dinner
